Dear requester

Request for Information

Thank you for your request for information which was received by NESO on 2 April 2026.

Your request has been considered under the Environmental Information Regulations 2004 (EIR) as we believe that the requested information falls within the definition of environmental information as set out in Regulation 2(1) of the EIR.

Request

You asked us:

Please can we receive a version of the data made public within page 7 of the NESO Summary of the Demand Connection Queue CFI <https://www.neso.energy/document/378226/download>, specifically the figures of CFI Demand Capacities by Area, Technologies, and Year Bands, but is it possible to get these figures for just the London RESP region geography rather than the relevant T-Zone geography (T11)?

Our response

We confirm that we do not hold the information you requested i.e. the aggregate CFI demand capacities on page 7 of our [Demand Call for Input \(CFI\)](#) summary document by technology and year bands for the Greater London RESP region.

The Information Commissioner's guidance on whether recorded information is held for the purposes of the EIR, advises that if a public authority has the "building blocks" necessary to

produce a particular type of information, it is likely that it would hold the information unless it requires particular skills or expertise to put the building blocks together.

To produce the data on page 7 of our [Demand Call for Input \(CFI\)](#) summary document we linked information provided by customers in the CFI responses to internal datasets. As we explain in the notes at the bottom of page 7, there were c.16GW of CFI responses with insufficient data to link to a systemised Connections Projects record. We hold information about the 56 projects that were linked to the T11 zone (SE England). Where these projects are connecting to an existing Grid Supply Point (GSP), we hold the coordinates of the connection site. However, where they are connecting to new nodes that haven't been built yet, we do not hold the exact geographical location of the connection site. As such we would not be able to determine whether these projects are within the Greater London RESP region boundary, and do not hold all the building blocks necessary to provide the aggregated figures you requested.

The EIR only apply to information held by the public authority at the time that the request for information is received (Regulation 3). Regulation 12(4)(a) of the EIR allows a public authority to refuse a request if it does not hold that information when an applicant's request is received. All EIR exceptions are subject to public interest test (PIT) however the Information Commissioner's Office (ICO) recognises that it is not possible to carry out a meaningful PIT where information is not held.

Advice and assistance

We may be able to provide aggregated figures for a more limited number of projects where we hold the exact geographical location of the connection site. It is difficult to estimate precisely how long it would take to extract this data and map the projects to the Greater London RESP region. This data would not answer your question about totals for Greater London RESP region and may therefore be of limited use.

We do not currently maintain a single register of demand connections. We have previously had enquiries about providing a demand register and are considering this as a development piece, but it would take considerable time to produce as the data is currently held in various data sources including contracts, and would need to be extracted from these sources, reviewed and consolidated.

Next steps

If you are dissatisfied with our handling of your request, you can ask us to review our response. If you want us to carry out a review, please let us know within 40 working days and quote the reference number at the top of this letter. You can find our procedure here: [Freedom of Information and Environmental Information Regulations | National Energy System Operator](#). The

ICO's website also provides guidance on the internal review process: [What to do if you are dissatisfied with the response | ICO](#).

If you are still dissatisfied after our internal review, you can complain to the Information Commissioner's Office (ICO). You should make complaints to the ICO within six weeks of receiving the outcome of an internal review. The easiest way to lodge a complaint is through their website: www.ico.org.uk/foicomplaints. Alternatively, they can be contacted at: Wycliffe House, Water Lane, Wilmslow, SK9 5AF.

Thank you for your interest in the work of the National Energy System Operator (NESO).

Regards,

The Information Rights Team, National Energy System Operator (NESO)
